

Deep Lukhi

deeplukhi11@gmail.com | +91 8460908591

SKILLS

LANGUAGES

C • C++ • JavaScript

BACKEND

Node.js • Express.js • REST APIs
JWT • Swagger/OpenAPI

DATABASE

PostgreSQL • MySQL • Prisma ORM

TOOLS

Git • GitHub • Docker • Postman

CORE CS

Data Structures & Algorithms • Object-Oriented Programming (OOP) • DBMS • Operating Systems • Computer Networks

EDUCATION

BHAGWAN MAHAVIR UNIVERSITY

B.TECH IN INFORMATION TECHNOLOGY

2023 -- 2027 | Surat, India

CGPA: 7.84 / 10

COURSEWORK

Data Structures & Algorithms
Object-Oriented Programming
Database Management Systems

ACHIEVEMENTS

- Solved **550+** DSA problems on LeetCode, GeeksforGeeks, and CodeStudio. Secured **Rank 1** on GeeksforGeeks at the university level.
- Built and deployed **2+** production-quality **backend** and **full-stack** applications; contributed to scalable **REST APIs** during a **6-month** internship.

SUMMARY

Backend Developer with experience building **scalable backend systems** and **REST APIs** using **Node.js**, **Express.js**, **PostgreSQL**, **Prisma**, and **Docker**. Strong foundation in **Data Structures & Algorithms** with **550+** problems solved and a **top university rank**. Passionate about designing **efficient**, **maintainable**, and **high-performance** backend architectures.

EXPERIENCE

VAILORA TECHNO LAB | BACKEND DEVELOPER INTERN

Feb 2026 -- Jul 2026

- Developed **40+** REST APIs across **Authentication**, **Employee**, **Task Management**, and **Daily Reporting** modules using **Node.js**, **Express.js**, **PostgreSQL**, and **Prisma ORM** for a **multi-tenant HRMS** platform.
- Designed secure **authentication and authorization** workflows using **JWT**, **bcrypt**, and **role-based access control (RBAC)** across multiple user roles.
- Optimized **backend performance** by refactoring complex **Prisma queries**, improving database interactions, and implementing efficient **indexing strategies** to reduce API response time.
- Architected **reusable service layers** and modular backend components following **layered architecture**, improving code maintainability and scalability.
- Diagnosed and resolved **20+ production issues** through **root cause analysis**, backend debugging, and database validation, improving **application stability**.

PROJECTS

SNIPPETVAULT | FULL-STACK CODE SNIPPET MANAGER

Node.js, Express.js, PostgreSQL, Prisma, React, Docker

Live | Frontend | Backend

- Built a **full-stack** platform enabling users to **create**, **organize**, **search**, and **share** code snippets with **syntax highlighting** and collections.
- Architected a **modular REST API** with **layered architecture**, **JWT authentication**, **request validation**, and **Swagger documentation**.
- Developed a **responsive React** frontend with **debounced search**, **client-side caching**, and optimized **state management**.
- Containerized with **Docker** and deployed on **Vercel** for consistent development and scalable delivery.

SOCIAL RECOMMENDATION ENGINE | GRAPH-BASED RECOMMENDATION SYSTEM

C++, Graphs, DSA

GitHub

- Built a **graph-based** recommendation engine using **adjacency lists** to model user relationships and content interactions efficiently.
- Implemented **collaborative filtering**, **popularity-based ranking**, and **BFS traversal** to generate personalized recommendations with **O(V+E)** time complexity.
